### Letters to the Editor

3 and 1.3 mm-observations of a complete sample of active galactic nuclei

*Chini, R., Steppe, H., Kreysa, E., Krichbaum, Th., Quirrenbach, A., Schalinski, C., Witzel, A.*

L1

Double mode pulsating stars and opacity changes

*Andreasen, G.K., Petersen, J.O.*

L4

The observed background solar velocity noise

*Jiménez, A., Pallé, P.L., Pérez Hernández, F., Régulo, C., Roca Cortés, T.*

L7

Discovery of a 9.5-year period in the symbiotic star V 1016 Cyg

*Nussbaumer, H., Schmid, H.M.*

L10

The IRAS 60/100  $\mu\text{m}$  brightness ratio in interstellar clouds

*Laureijs, R.J., Chlewicki, G., Clark, F.O.*

L13

Cold CO in Mergers:  $^{12}\text{CO}(1-0)$  and  $^{12}\text{CO}(2-1)$  mapping of NGC 2623 and ARP 220

*Casoli, F., Combes, F., Dupraz, C., Gerin, M., Encenaz, P., Salez, M.*

L17

### astrophysics

6-cm observations of LBDS radio sources. Radio properties of blue radio galaxies

*Oort, M.J.A.*

42

Structural changes in the nucleus of the double radio galaxy 3C 390.3

*Alef, W., Götz, M.M.A., Preuss, E., Kellermann, K.I.*

53

On the progenitors of type II supernovae in M 83

*Rosa, M., Richter, O.-G.*

57

The axisymmetric spiral magnetic field in the galaxy IC 342

*Gräve, R., Beck, R.*

66

SC 2059-247: no evidence for cluster evolution or extreme X-ray properties

*Kaastra, J.S., de Korte, P.A.J.*

77

The active centre of the galaxy merger ESO 148-IG 02. II

*Johansson, L., Bergvall, N.*

81

Contribution of Fe II to the asymmetry of H  $\beta$  in active galactic nuclei

*Joly, M.*

87

Prediction of absorption line statistics for a network of quasars behind the Virgo cluster

*Davies, J.I., Disney, M.J., Philipps, S.*

90

(RN) Morphological segregation between spiral members of groups of galaxies

*Giuricin, G., Mardirossian, F., Mezzetti, M.,*

*Amati, A., Ramella, M.*

95

cluster spectra on the nature of elliptical galaxies

98

### cosmology

properties of the halo and visible matter as a function of the neutrino mass

*Barbieri, R.*

107

The distribution of light and mass in galaxy clusters

117

### galaxies

The light distribution in the

128

ten years of photometry of the long-period variable  $\sigma$  Geminorum

*Hall, D.S., Eaton, J.A.,*

*Wicksdale, W.S., Reisenweber, R.C.,*

*Landes, M., Zeigler, K.W.,*

*Masson, R., Nielsen, P., Louth, H.,*

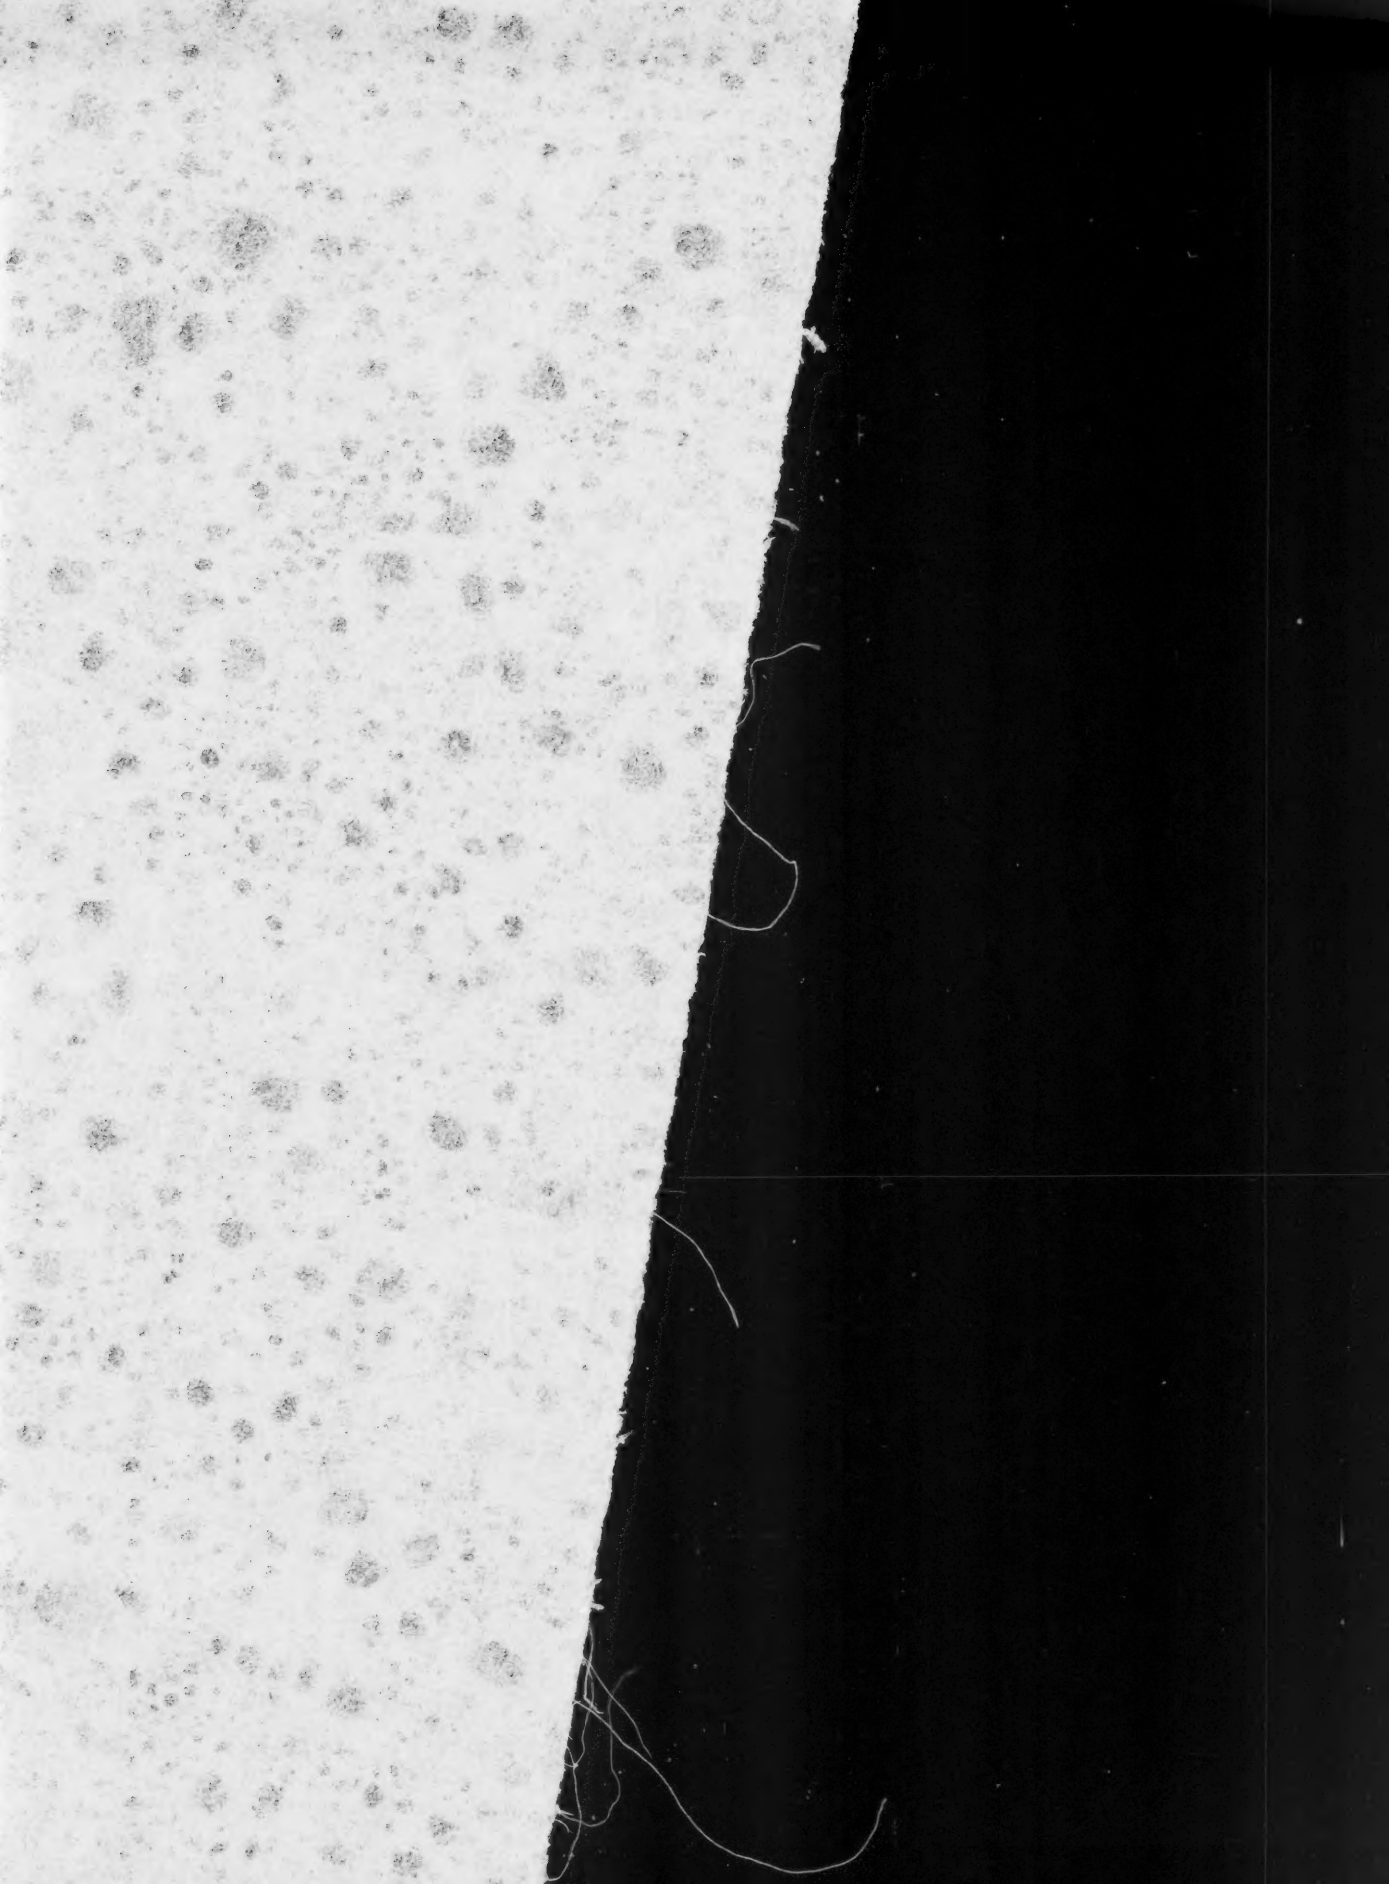

*Fortier, G., Grim, B.S., Turner, L.C.,*

*Masson, D.M., Fried, R.E.,*

<i>Brettman, O.H., Engelbrektson, S., Krisciunas, K., Miles, R.</i>	135
The recurrence behaviour of X-ray bursts from 4U/MXB 1735-44	
<i>van Paradijs, J., Penninx, W., Lewin, W.H.G., Sztajno, M., Truemper, J.</i>	147
The structure of the molecular outflow near SSV 13 and HH 7-11 in the NGC 1333 region	
<i>Liseau, R., Sandell, G., Knee, L.B.G.</i>	153
Accretion disk coronae and the contribution to angular-momentum transport in the disk	
<i>Burm, H., Kuperus, M.</i>	165
The mass-loss rates of Wolf-Rayet stars	
<i>Doom, C.</i>	170
The surface temperature of C/O-rich Wolf-Rayet stars
